Angad Gunbharit

Philadelphia, PA | +1-415-610-9583 | gunbharitangad@gmail.com | LinkedIn

Summary

Solutions Architect with 4 years of experience in end-to-end API integrations and cloud-based SaaS deployments. Expertise in guiding enterprise clients through requirements discovery, sandbox testing, and go-live management to ensure seamless integrations. Proven track record of collaborating with product and engineering teams to optimize user flows and drive operational efficiency. Skilled at translating business objectives into clear technical solutions.

Skills

- **Technologies & Development:** Java, Angular, SQL, Power Bi, Oracle, PostgreSQL, Excel Spreadsheets, Spring, Microsoft Services, Python, API Integration, Email Server Integrations, Web Technologies, SFTP, Fintech, Data Flows
- **Cloud & SaaS:** Microsoft Azure AZ-900, AWS Cloud Practitioner, Cloud Computing, SaaS Architecture
- **Analytics:** Data Analysis, Visualization, Sampling, Masking, Ethics, Data-Driven Decision
- **Project Management & Communication:** Agile (Scrum, Kanban), DevOps, JIRA, ServiceNow, Slack, Confluence, Drop box, Consultative Discussions, Talent Acquisition, HR Technologies, Artificial Intelligence, Machine Learning, Technical Program Management

EXPERIENCE

Phenom People | *Associate Solutions Architect* — May 2025 - Present

- **Owned solution definition and delivery** for 3 enterprise SaaS customers across healthcare, manufacturing, and electronics, driving end-to-end implementations within a 6-week delivery window and applying technical program management best practices
- **Led requirements discovery and prioritization** across client stakeholders, product, and engineering teams, reducing solution rework and back-and-forth by 30%.
- Drive business process redesign for a client's HRIT ecosystem, leveraging AWS, data flows, and API Integration to align platform capabilities with user workflows, boosting internal operational efficiency by 25%
- **Partnered with product and design teams** to optimize career site modules, increasing user engagement by 40% and improving job application conversion rates.
- Act as the primary decision-maker for scope and tradeoffs, using JIRA to manage priorities and ensure on-time delivery while maintaining high customer satisfaction
- **Selected as one of a small group for a customer implementation bootcamp**, where I **drove process redesign and prioritization improvements**, reducing average implementation time from **4–5 months to 32 days**

Ipser Lab - Tetra Labs | *Product Manager* — May 2024 - May 2025

- Owned the product roadmap for a fintech SaaS backend platform, using API integration and Slack for stakeholder communication, which kept development aligned with business goals and reduced feature delivery delays
- **Identified performance bottlenecks impacting user experience** and drove backend optimizations within the SaaS architecture, reducing database query time by 30%.
- **Defined product requirements and success metrics** for a system supporting 10,000+ concurrent requests with zero downtime.
- **Drove adoption of machine learning–powered features**, improving funding prediction accuracy by 15% and enabling more informed decision-making.
- Aligned engineering, data, and business teams by translating technical concepts into clear product narratives, leading consultative discussions and demos that enabled faster decision making and smoother project execution

Amdocs - ABN-AMBRO Bank | *Technical, Product Manager* — Aug 2022 - Jul 2023

- Engineered an advanced banking system using microservices and API integration to improve performance and scalability, which increased customer satisfaction and operational efficiency by 40%, while engaging in technical discussions to clarify requirements.
- Designed and implemented core financial modules for Amdocs Financial Services, enhancing data flow and reducing processing time by 30%, and effectively communicating complex technical concepts to both technical and business teams.
- Launched data visualization initiatives that enhanced financial reporting accuracy by 25% and increased decision-making efficiency by 20%, supporting the integration of technical documentation into ongoing process improvement.
- Defined and executed an API strategy using Spring Boot, redesigning secure and high-performing APIs that improved database performance and reduced system downtime by 56%, demonstrating proficiency in integration tools and web services.

Capgemini | *Senior Product Engineer* — Jan 2020 - Aug 2022

- Led development of a Workorder Management System for a Swedish client using Java, Angular, Spring, and Power BI, cutting response time by 68% and automating processes to improve operational efficiency
- Defined and executed UX/UI enhancements that improved system usability and increased customer retention by 57%, while leveraging data-driven decision-making to refine technical documentation and processes.
- Coordinated cross-functional collaboration between engineering, design, and business teams to streamline package deployment workflows, achieving a 73% improvement in system efficiency and ensuring effective integration with client technologies.
- Directed a Power BI analytics initiative to optimize database performance and enhance data visualization, resulting in a 40% increase in team productivity and supporting clear communication of complex technical data.

EDUCATION

UNIVERSITY OF SAN FRANCISCO — Aug 2023 - Dec 2024

Masters in Science, Information Systems

- **Achievements:** Dean's Service Award 2024
- **Coursework:** Information Security & Risk Management, Data Analytics & Visualization, IT Project Planning & Budgeting, Systems Integration & Architecture

Savitribai Phule Pune University, Sinhgad Academy of Engineering — Jul 2017 - Nov 2020

Bachelor, Computer Engineering

- **Coursework:** Data Structures & Algorithms, Software Engineering & Project Management (Agile, SDLC), Database Management Systems & Computer Networks & Security, Big Data Analytics
